VHDA - Implements ProLinkCMO™

March 22, 2006

Richmond, VA – The Virginia Housing Development Authority (VHDA), the Commonwealth's mortgage finance agency, has awarded Analytic Solutions a contract to implement ProLinkCMO™ to help support its Multifamily Development operations.

"Analytic Solutions is proud to provide a system that allows VHDA to capture data effectively while managing the many nuances of a Multifamily Portfolio," said Shawn McKenna, President, Analytic Solutions. "ProLinkCMO™ gathers data in a consistent and logical manner from creation to final disposition, using a common set of tools, standards and policies."

Analytic Solutions' software will improve VHDA's automation and business processes as well as consolidate redundant data sources and improve data accuracy.

"ProLinkCMO™ integrates Multifamily data across organizational business units to make information more accessible and easier to understand to a wide array of VHDA's stakeholders. This maintains process flexibility and supports frequent changes to business processes in a timely manner," said Robert Frisch, Vice President of Development, Analytic Solutions.

"This software will play a large role in supporting our mission to help low- and moderate- income Virginians attain quality, safe and affordable housing," said Mike Boice, VHDA Multifamily Applications Manager. "We are pleased to take this step toward becoming the Leading Mobilizing Force for Affordable Housing in Virginia."
